

26.10.2018

Member of the week

In addition to celebrating our early success, we would also like to give our congratulations to a very productive member of ours. Leroy Lai has shown much dedication to the team, being the first to approach us with sponsorship contacts and being both punctual and responsible. He has been a great help in reaching this goal, managing to get in contact with a whopping 3 firms at once. Leroy is a role model for our team, setting an example and embodying the STEM spirit we wish to promote in all of our team members.

Thank you!

Furthermore, we would like to give thanks to all the school faculty members who have helped us along our way. We would like to give special thanks to Mr Hawkins, Ms Stevens, Mr Zhao, Mr Broadhead, Mr Greene and Ms Tomaszun. Your contributions to our founding and development have been imperative to our success. Rest assured that they will not be forgotten.

Lastly, we cannot forget our dear sponsors. Your investment in our team reflects your wish to see the youth prosper and grow into aspiring leaders, problem solvers and societal contributors in the future. It should be noted that 100% of your donations will be reinvested in the members of our team, helping them along in taking their first steps forward on a challenging but rewarding journey.

Who are we?

Helion is a student-led organisation with the aim to compete in the FIRST Robotics Competition. Our mission is to inspire and develop young people, by engaging them in worthwhile roles that build engineering skills, improves entrepreneurial thinking, and inspires innovation.

Achievements

We are proud to announce that we have raised a large amount of funding from several sponsors. After an intense period of sponsorship contacting, back and forth negotiations and logistical work, we have managed to make our registration goal and are on the way to meeting our goal of competing in the FRC competition. We will soon be investing this money, that was graciously given, into buying components to be used in the building process as well as further marketing ventures. With this money, we will strive to do the best we can to be successful in achieving our goal of educating and giving experience to the students in the team as well as competing in the highly regarded competition.

Why Chicago?

Due to recent policy introductions by China's Ministry of Education, we have been transferred, by the FIRST organisation, from our original regional location in Shanghai to the Midwest Regional in Chicago. Due to the sudden changes in policy, FIRST was not able to finalise legal procedures regarding the Chinese regionals. As a result, all Chinese regional events have been closed for the season.

Chicago is a burgeoning tech city and the 5th largest and 11th fastest-growing tech market in the US, offering approximately 40,000 job opportunities in STEM fields. All in all, Chicago is a fantastic location to advertise technology companies and startups which we can provide. Despite these unforeseen changes, we shall continue to uphold our values in the upcoming US regional.

Further support

Our FRC team Helion has a new challenge on the horizon; more funding to get us to Chicago! Due to the policy changes and the termination of this season's China regionals, we have set our sights on the prestigious Chicago regional as our new goal, and we need YOU! Esteemed Sponsors, please aid us in our mission to Chicago so that we can represent your brand in one of the fastest and largest growing tech cities in the USA. We do hope you consider further helping us so that we can help you in return. See you in Chicago.
